

# Instructors: 24 Senior Researchers from Academia, Industry and Regulatory Agencies Trainees: 60 PhD/MSc students and scientists involved in biomarker research

### Introduction

The quest for novel biomarkers is a popular research activity with high productivity. Thousands of studies are published claiming the discovery of biomarkers suitable for improving disease management. The stark reality though indicates that very few potential biomarkers are approved for clinical use. The application of omics approaches (Genomics, Transcriptomics, Proteomics, Metabolomics, etc.) in biomarker discovery has contributed significantly in increasing the number of publications reporting initial findings that are not validated. Major issues associated with this dire situation are the difficulty in analytical validation of robust biomarker assays, flawed study design, and the inability to exploit the full potential of highthroughput omics approaches. Thus, there is a waste of research resources without tangible **benefits to society.** Moreover, there are many unmet clinical needs that are not currently addressed by the available biomarkers in diseases of high prevalence and of high financial and social cost such as cancer, cardiovascular disease, chronic kidney disease, and chronic obstructive pulmonary disease. This situation is partly due to a lack of education resources dedicated to omics studies in biomarker research.

# **Teaching objectives and topics**

The unique feature of the proposed workshop is that it will expose the problems associated with omics biomarker studies and train a new generation of scientists able to fix the flawed biomarker discovery and implementation paradigm. In order to achieve this ambitious goal **the following specific teaching objectives are set so that students can**:

1. obtain a global view of omics approaches and the biomarker life cycle from discovery to clinical implementation

2. acquire skills relevant to biomarker data analysis (analytical assay validation, clinical performance)

3. develop critical thinking by thorough evaluation of published biomarker studies, and improve writing and presentation skills

**The following topics** be covered during the workshop:

A) Introduction to the different **biomarker types** (diagnostic, prognostic, etc.)

B) Introduction to the different **omics approaches** and their application in the context of biomarker research

C) Emphasis on the importance of **defining the biomarker context of use** in the clinical setting before initiating a research protocol on biomarker discovery and validation

D) Presentation of **good biomarker practice guidelines** on:

1. **study design** (number and type of samples, proper statistical analysis, reporting of all findings, etc.)

2. analytical validation of assays (reproducibility, LOD, linearity, etc.)

3. clinical performance (sensitivity, specificity, etc.), validation in an independent large set of samples (ideally multi-center study) by different researchers (external independent validation)

4. comparison of the performance of the new biomarker with biomarkers already used in clinical practice (umbrella reviews)

5. tools for assessing if biomarkers are effective in improving concrete patient clinical outcomes (randomized trials, etc.)

6. implementation in sub-optimal conditions and different populations.

	Daily Program							
	Mon, Sep 23	Tue, Sep 24	Wed, Sep 25	Thu, Sep 26	Fri, Sep 27			
09:00	Arrival and Registration	Introduction to omics and	Biomarkers for doping	Biomarkers in Screening	Biomarkers for psychiatric			
09:30	-	Biomarkers	Sulev Kõks	for Obstructive Sleep	disorders			
10:00	_	Antonia Vlahou Biomarker panels by	Biomarker clinical	Apnea <b>Deborah Penque</b> Proteomics for anxiety	Chris Turck Predictive biomarkers for			
	_	CE-MS	implementation	disorders: mind the	CVD			
10:30		Harald Mischak	Eva Caceres	mitochondria	Andreas Simm			
				Michaela Filiou				
11:00		Coffee break	Coffee break	Coffee break	Coffee break			
11:30		Targeted proteomics	Quality control in biomarker	Proteomics for biomarker	Biomarkers of healthy ageing			
12:00		assays for biomarkers	research	discovery	Niki Chondrogianni			
		Virginie Brun	Andrea Wutte	Michalis Aivaliotis				
12.30		Student talks	Student talks	Student talks	Student talks			
13:00		1-13	19-31	36-48	49-60			
13.30								
14:00		Lunch Break	Lunch Break	Lunch Break	Lunch Break			
14:30	_	Poster viewing	Poster viewing	Poster viewing	Poster viewing			
15:00	-	Discussions Free time	Discussions Free time	Discussions Free time	Discussions Free time			
15.30		High sensitivity	Analytical validation of		Meet the expert			
40.00	_	immunoassays	sRAGE MRM assay	Cultural excursion	Biomarker assay validation			
16.00		Stanislav Kuula	Rainer Bischoff		Study design, MRM data analysis			
40.00		Student talks	Student talks		Eureka: something is rotten			
16:30		14-18	32-35		in the biomarker kingdom			
17:00	-	Coffee break	Coffee break		Makis Zoidakis			
	_	Changing the biomarker	Biomarkers used in clinical		Coffee break			
17:30		implementation paradigm	practice for monitoring		Epigenetics and Redox Biomarkers			
18:00		Peter Groenen	biological drugs		Alexander Bürkle			
			Begoña Oliver					
18:30	7	Genomics biomarkers	Liquid biopsy preparation		Oxidative stress and			
		Lila Koumandou	Chris Sutton		biomarkers			
19:00	Welcome	Molecular diagnostics:	Antibody Quality Control		Grune Tilman			
	Niki Chondrogianni	from bench to clinic	Saara Wittfooth					
10.20	Makis Zoidakis	Daria Ler	Dester session		Summing Up			
19:30	Biomarkers at the interphase of academia	Poster session discussions	Poster session discussions		Summing-Up Round Table			
20:00	and industry							
	Alain van Gool							
20:30	Welcome reception	Dinner	Dinner	Dinner	Farewell reception /			

### Instructions for applicants and selection criteria

The training school will target early stage researchers (ESRs) with a background on molecular biology, biochemistry, chemistry, and medicine, primarily experienced PhD students and post-doctoral level scientists within 5 years after completion of their doctorate. Trainees will be selected primarily based on their qualifications relevant for the course content, their potential to contribute to the breadth of science and the benefit they are likely to obtain with respect to their future careers, while ensuring a broad participation from different countries.

Applicants should send to izoidakis@bioacademy.gr the following documents:

- 1. A two-page CV
- 2. A letter of intent that clearly states why she/he intends to participate in this training school (300 words maximum).
- 3. An essay (300 words maximum) supporting or opposing the use of PSA in a specific clinical context.

# Deadline for applications: 16<sup>th</sup> of June 2019

The trainees whose application is approved will prepare a poster on their research and a 3 minute presentation of the main points of its content that will be followed by a 2 minute discussion. Thus, all trainees will have the opportunity to present themselves and their research before the poster sessions. Particular emphasis will be given to poster sessions since they allow trainees to present their work to their peers and to experienced researchers, get feedback on their projects, and eventually establish fruitful collaborations.

For additional information contact Makis Zoidakis (izoidakis@bioacademy.gr)

#### Venue information

The course will be held at Spetses Hotel in Greece (https://spetses-hotel.gr/en/)

The island of Spetses is easily accessible from and very well connected to Athens. Spetses is a wellestablished location for scientific training events and this hotel has successfully hosted many FEBS and IUBMB Advanced Courses in the past, with consistently positive experience and feedback. The hotel is easily accessible, but is in a quiet and secluded area of Spetses, allowing the participants to focus fully on the training course, and ensuring a perfect atmosphere for a relaxed but intensive interaction between the senior scientists and the trainees.

The hotel has full lecture facilities (the B. Clark lecture theatre with audio-visual aids, photocopiers, computers and free internet access) as well as ample space for poster sessions and informal meetings allowing direct interaction between participants, including the daily "meet the experts" sessions in the afternoons.

The meeting is on a full-board residential basis, so participants and lecturers will have all meals together, thus allowing additional informal discussions during these periods. The hotel has already confirmed reservation of the venue for the duration of the course and offers special group rates for the participants and lecturers of the course

# **Registration fee**

Total all-inclusive registration fee for young scientists is (in €uro):				
This all-inclusive registration fee <b>breaks down</b> into costs for the whole duration				
of the workshop:				
<ol> <li>Meals (breakfast, lunch &amp; dinner) :</li> </ol>	229	€		
2. Accommodation (double):	290	€		
3. Administrative part of registration fee:	31	€		

#### **Course Organizers**

Aivaliotis Michalis, Aristotle University of Thessaloniki, Greece
Chondrogianni Niki, National Hellenic Research Foundation, Greece
Filiou Michaela, University of Ioannina, Greece
Koumandou Lila, Agricultural University of Athens, Greece
Tilman Grune, German Institute of Human Nutrition Germany
Zoidakis Makis, Biomedical Research Foundation Academy of Athens, Greece

#### **Speakers**

**Bischoff Rainer**, University of Groningen, The Netherlands Brun Virginie, Protein Dynamics Laboratory CEA, France **Bürkle Alexander**, Department of Biology University of Konstanz, Germany **Caceres Eva**, Immunology Division, Universitat Autònoma Barcelona, Spain van Gool Alain, Radboud University Medical Center, The Netehrlands Groenen Peter, Idorsia Pharmaceuticals, Switzerland Kõks Sulev, Murdoch University, Australia Stanislav Kuula, Merck Chemicals GmbH, Germany Ler Daria, EUROFARM Centar Laboratory, Bosnia and Herzegovina Mischak Harald, Mosaiques Diagnostics, Germany **Oliver Begona**, Instituto de Investigacion Biomedica de Malaga, Spain Penque Deborah, National Institute of Health Dr Ricardo Jorge, Portugal **Simm Andreas**, Martin Luther University Halle-Wittenberg, Germany Sutton Chris, University of Bradford, UK **Turck Chris**, Max Planck Institute of Psychiatry Munich, Germany Vlahou Antonia, Biomedical Research Foundation Academy of Athens, Greece Wittfooth Saara, University of Turku, Finland Wutte Andrea, Biobanking and BioMolecular Resources Research Infrastructure, Austria
